

Dual Sport Information

We should have about a 30-mile loop laid out for everyone to enjoy. If you've ridden past year's events you know what to expect. If you never ridden this event then expect some open fields, wide trails, single track, some road, and maybe a small creek crossing or two. Brush guards are recommended but probably not required, you'll just have to slow down in a spot or two. This event is geared more towards having an enduro bike unlike some dual sports that cater to real dual sport bikes.

Headlight and Taillight must be mounted! It's your responsibility if they work. We will get on about 5 miles road, so yes we require lights to be mounted. We will not let MX bikes out on the course.

You must be able to make the entire loop on gas, we will not have a gas stop out on the loop. The loop will be no longer than 30 miles.

No riders under the age of 16, riders must have a valid drivers license.

If for some reason you think you are lost please DO NOT cut across fields, woods, etc. Please stop for a minute and look or listen for other bikes. There may be spots that we are told not to ride across that you don't know about.

If you break down please stay with your motorcycle. There will be many club members riding the event today and they will be able to assist you. We will also run a sweep crew at the end of the day to make sure everyone is off the course.

Please take it easy on the road sections. If they are gravel do not tear them up, ride easy and get off them. Do not speed on the roads.

Please do not stop on the road sections to take breaks, ride into the section far enough to be "out of sight"

If you like this event and like to see it going for years to come, do not come and try to ride these trails! They are all on private land and not open to the public at any time except for the clubs events.

Please attend the riders meeting at 9:15, 1st rider out at 9:30 South West corner of start area. Last Rider out 12:30 no exceptions!

Course Information

Loop is approximately 25-30 miles long

There is approximately 4-5 miles of road, some paved, some gravel

You will be following Orange / Black arrows all day. There are several landowner lawns i.e. grass do not tear it up, also when going unto to roadways stop and look then do not tear up the gravel roads. DO NOT speed, “not a Race”.

If you see Pink / Black arrows on the trail, this means it is the easy way around something

There are several minor creek crossings and bridges to cross. Don't fall off, should be easy☺

We are running between many creeks and fields with Barb Wired fences, washouts, field holes, and beaver stumps that could ruin your day so be extra careful in these areas.

There are some sections of trail near Winter Wheat, stay on trail do NOT cut! Follow arrows!
